

# AluCoating<sup>®</sup>

A COATING SERVICE FOR ALUMINIUM PROFILES

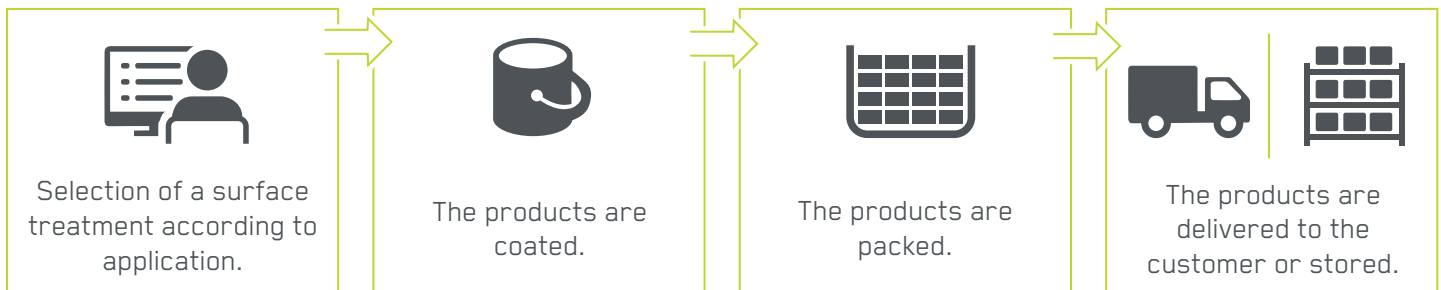

**MÄKELÄ ALU**

“The profiles are given a surface treatment to meet application requirements using either powder-coating, anodizing, or Decoral surfacing.”

## Customer benefits

- » The opportunity to select a coating colour for your profile from an extensive range of colours, anodize the profile in its natural colour, or choose fantastic Decoral surfacing.
- » Mäkelä Alu’s GSB-certified painting line guarantees an extremely high-quality end result.
- » The coating of peripheral components is easily carried out while the profiles are treated.
- » By combining the additional AluCoating<sup>®</sup>-service with the AluStorage<sup>®</sup>-service, coated profiles are delivered quickly, right when you need them.

## Operating model

## AluCoating<sup>®</sup> -service options
