

AluDesign[®]

A DESIGN SERVICE FOR ALUMINIUM PROFILES

“The best result is achieved when we are able to participate in the early stages of product development, preferably right from the drawing board.”

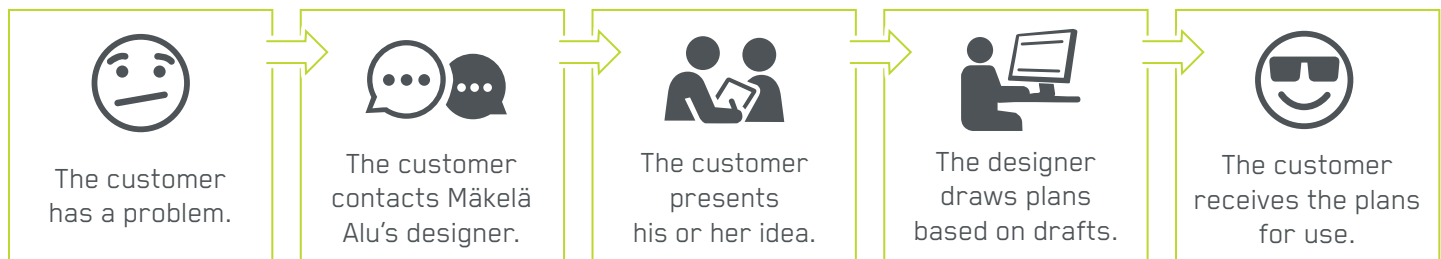

MÄKELÄ ALU

Customer benefits

- » You will receive a profile designed precisely to meet your needs.
- » The service supports your own product development.
- » An expert designer can determine what alloy and surface treatment suit the application.
- » The functionality of the ready product, the amount of material needed, and production efficiency are checked so the cost-efficiency of the solution is carefully calculated.
- » Product images and 3D models will remain yours for use as necessary.

Operating model

Features of the AluDesign[®]-service

- » Supports your own product development.
- » Modern CAD implementation.
- » Assistance with assembly and mechanical design.
- » The end product can be visualised using 3D modelling.
- » You receive the designed material for use.
