

AluPlanet®

LOW-CARBON ALUMINIUM PROFILE PRODUCT FAMILY

AluPlanet® is an environmentally friendly aluminium profile product family designed to meet sustainability requirements and support planetary durability. Our AluPlanet® products play a key role in combating climate change.

Our product family consists of three unique options:

AluPlanet® Basic

Emissions 2.04 tn CO2e/t

- A recycled and low-carbon untreated aluminium profile that combines quality and environmental responsibility.

AluPlanet® Paint

Emissions 2.59 tn CO2e/t

- A powder-coated aluminium profile that offers a durable and stylish finish with minimal emissions.

AluPlanet® Anod

Emissions 2.24 tn CO2e/t

- An anodised aluminium profile that is produced energy-efficiently with environmental considerations.

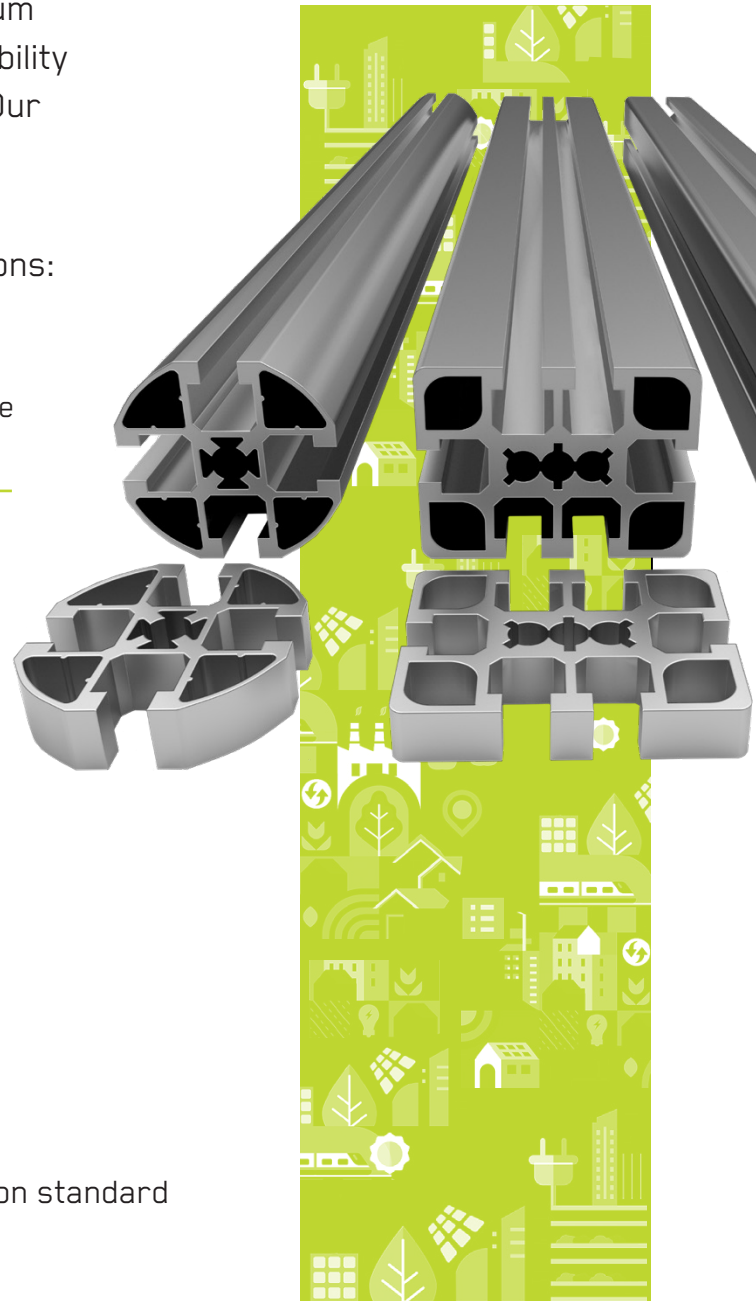

ALLOY: **EN-AW 6063**

The motto of the AluPlanet® product family is a more sustainable future, both in terms of the environment and quality.

The raw material (A1) emission calculation is based on standard ISO 14025 and EN ISO 15804:2012 + A2:2019
